Utility:

PumpShibaX will release its Play to Earn (P2E) blockchain game, allowing users to earn rewards, purchase non-fungible tokens (NFTs) to use within the game.

In order to expand the PumpShibaX ecosystem, a decentralized application (dApp) will be enhanced to implement in-app betting.

Security:

Aware of all the scams around the crypto sphere, especially the Binance Smart Chain, our holders' trust and safety are our number 1 priority. The contract will be audited before the presale. Our contract will be public and available to everyone who wants to read it.

PancakeSwap Liquidity will be locked for 3 months and will be extended for 5 years. We will use the auto lock function from the Pinksale platform.

We will frequently organize AMA with the whole team to be fully transparent in front of our community.
